BAG FILTER(YTLD)

Technical datasheet

Material	Size (diameter*length)	Filtration rate (nominal rate)	Adapter
Polypropylene (PP)	180*410 (1#)	0.5-100 (μm)	Plastic ring (PP ring valgus, PP ring varus)
Nylon (NL)	180*810 (2#)	40-500 (mesh)	Steel ring (Stainless steel ring)
	Accept OEM service		

Main applications

Intercept large particles, mainly used to filter out large impurities in the pre filtered liquid of materials. Impurities are stored in filter bags and replaced when the pressure difference increases
